Tags: [suppressortools](#) [rugged](#)

This is a replacement front cap tool for the Rugged Oculus 22 suppressor. If you lose the original, or just want a better fitting design, this one works.

I printed it in PLA which should be fine as long as you don't use it when the suppressor is hot.

I have uploaded two versions.

Rugged Oculus 22 Endcap Tool - no supports needed

Rugged Oculus 22 Endcap Tool with finger indent - requires supports on my printer.

This model has an indent for your finger to help with holding the tool against the endcap while tightening it.

Tinkercad file if you want to play with it:
