### Summary

Made this little Cherry Keycap with a cowboy hat. I used .12 fine detail and 45 speed.

I created a keycap in the shape of a cowboy hat for my Razer keyboard. Here are the settings I used: a layer height of 0.12mm, a printing speed set to 50, nozzle temperature at 200 degrees Celsius, and a bed temperature of 50 degrees Celsius. I quickly painted it with a paint pen for a fun look, but I can redesign it using multi-filament if you'd like. Please let me know if I should make a whole series of Western-themed keycaps!
