Summary

Face cover to soften the impact when Loon slams into metal furniture legs, tiled corners etc etc.

Tags: [protector](#) [robotics](#) [loona](#)

Face bumper to soften the impact when Loona (tic) slams into metal furniture legs, tiled corners etc etc, and then backs out and keeps slamming into it 3 or 4 times more just for good measure.

It also has protection that goes back over the head, as my Loona tends to scratch that area a lot.

Looks a little like a 'Knight's Mask', and definitely not as cute looking as without it.

Bottom clips on, and the top is secured by double sided PE tape. stick on the top first, and then clip in the bottom.

No doubt there will be revisions to this, but this version works well for me.

There are 2 versions, one with and one without the front mesh / grid.
