### Summary

Form my Ender 3 V2 Neo out there only complex duct and shroud. I did my own simple and EZ

I didn't find simple and EZ 5015 fan blower duct for my Ender 3 V2 Neo. I already have a good hotend fan support, and wanted to make more powerfull the cooling fan.

This duct doesn't mess with heat cartridge cable because has duct fron and right.

Easy to mount just remove stock support and apply the mine. Use a good 5015 blower.

Very nice with the EZ minimalistic fan support:

Printed in PLA+, use support as in the Cura picture.
