To be used with my tennis ball messagers (<https://www.prusaprinters.org/prints/50860-tennis-ball-massager>). When using 2, it's sometimes a hassle to keep them evenly spaced so I created this little tray to keep them 10cm apart on center. I'm working to make the base adjustable in the near future.

Uploaded V2 as the fit was a little too tight. V1 works, but V2 is better.
