Summary

light shade to shield recessed light from hitting home theater projector screen

[Household](#) > [Living Room](#)

6 inch Recessed light shade

I have can lights in my theater - I hate sitting in the dark all the time but the light from the can lights spills onto the screen and washes out the image from the projector. These half circle shades fit on to recessed light trim very snugly and as you can see from the wall in the picture, stop the light from going towards the screen.

I should add my projector is an ultra short throw - I'm not sure how well this would work with a traditional throw projector.

There are several versions of this out there but none that fit my can lights.

Kudos to "THAMIDI" on 3dcults as I used his ring as a template : <https://cults3d.com/en/3d-model/home/6-inch-light-housing-trim-with-lip>
