Simple sheet holder to store 3 " MK3 sized" sheets, and 2 "mini sized" sheets.

The sheets all have a different height in the holder to improve access.
Printable without supports.

Print instructions

My selves I've printed it in Transparent PETG with 2 perimeters and 10% gyroid infill (which nicely shines through) with a 0.4mm nozzle and 0.2mm layer height.

Can be printed in the material of your choice.

2 perimeters and 2 top- and bottom layers will be sufficient.
