Prusa MK4

[Hobby & Makers](#) > [Organizers](#)

Redesigned tool caddy for MK4 items. Has spots for multitools, bearing lube tube adapters, allen wrenches, pliers, etc.

Has two style of mounting brackets, lip brackets fit over the edge of lack enclosure or screw on brackets if you want to permanently mount (just cut thin piece going between the mounts after mounting).

Sliced file has minimal custom supports. Do not recommend using organic supports because the don't work on the large tray section. If you want the "multi-color look" simply pause prior 6mm and execute color change. Pausing at 3.2 mm will put color change halfway through support items. (Photo has color change after 4mm)
