Tags: [thirdreality](#) [thirdrealitytemperaturesensor](#)

Flat surface mounting option for the ThirdReality Temperature and Humidity sensor.

Instead of using 3M VHB tape or command strips to attach the mount to a wall or other flat surface, you can use a small screw such as a #8 screw to attach the mount to a flat surface.

Using these mounts means that you don't have to attach 3M VHB tape or command strips to the actual sensor.
