No multi-material capability needed! All you have to do is add in color swaps and change manually at the appropriate time.

HueForge Painting of Chewie. Key is to use TRANSPARENT red or it will come out more orange than brown. Note that you can probably stop the print early, I forgot to reduce the number of white layers.

Print at 100% infill with a layer height of 0.1mm with a base layer of 0.2mm

Filaments Used:

PETG Polymaker Black

PETG Atomic Brown

PETG Polymaker Yellow

PETG Atomic Transparent Red

PETG Overture Space Gray

PETG Overture White

Swap Instructions:

Black until layer #4 at 0.5mm

Brown until layer #6 at 0.7mm

Yellow until layer #7 at 0.8mm

Red until layer #8 at 0.9mm

Grey until layer #12 at 1.3mm

White for the rest.
