### check out the other versions

#### it's bigger it's more stable and it's expandable

here the latest version of the bottle dryer in different versions

this version is taller and wider than previous versions

i added a dovetail connector system so you can connect the systems

it brings more stability with heavier bottles or if you want to dry something bigger

but is space-saving because it can be completely disassembled

All versions can be printed without support

#### !!!Attention!!!

the connector system has a tolerance of 0.2mm check your flow

## recommended print settings
