[schubladenknopf](#)

The "Schubladenknopf" (drawer knob) is a knob for the original drawers from the Ikea® Kallax® system. The knob replaces the original metal knob and has to be fixed with the original included screw.

I designed the 3D model of the knob in Shapr3D, spliced it with PrusaSlicer and let it print with my Prusa i3 Mk3. Supports are not necessary when printing it upside down. Best printing setting is "0.20 mm QUALITY" with PLA.
