Summary

Simple magnetic remix of the Super Flexi Gecko by Martin Rigatoni

[Toys & Games](#) > [Other Toys & Games](#)

Tags: [magnetic](#) [flexi](#) [articulated](#) [animal](#) [magnet](#) [gecko](#)
[lizard](#)

Geckos are usually found on the wall, so I modified Martin Rigatoni's great model so that it can be fitted with two 6x3 round magnets. Now you can attach it to any metal surface.

If you are interested, I can also create versions for other magnet sizes, just let me know.

Update: i have added a version for two 5x2 magnets

Attention: the holes have zero tolerance, if the printer is well adjusted, the magnets should be able to be pressed into the holes with a little force and then hold without having to glue them.

If the holes are too narrow you can heat the magnets a little bit and then press them carefully into the holes.

Or alternatively you can scale the model up a bit (about 101%) and then fix the magnets with glue if necessary.
