Summary

Didnt found any Glue Jig for 1/8 Buggy Tires, so i designed one myself

[Hobby & Makers](#) > [RC & Robotics](#)

Tags: [glue](#) [tire](#) [jig](#) [buggy](#) [reifenkleben](#)

Found only jigs for 1/10 tires so i designed a new one.

Printed it in ABS (base and sideparts)

The Top Part takes lots of load so i printed it in PC-CF but every other mateial with 5-6 walls and high gyroid infill (40%) should work.

i glued a coin unter the high setting screw so the screw dont bury into the material
