If you're like me and cant tie a knot to save your life you've probably lost your fair share of these when digging for Quahog clams on the shores of Rhode Island in the summer. I used to buy these at Benny's 🤦 but with them closing I decided I had to print my own. Works great now I just need to find a spot with more keepers!

I printed in PLA with 30% infill. IT FLOATS!

I fastened mine to my basket with 550 paracord. Remember, if you cant tie a knot tie a lot!

Enjoy the print, get out and get digging!
