Replacement ball joints for Joby clamp.

The original ball joint, crumbled away just by looking at it.

Make sure to reuse the screw part from the original ball, cut it into smaller pieces.

Reuse the rubber spacer.

Test fit it into the hole before glueing it into place. (it's a tight fit for the hexed/upper part of the hole).

No support needed

I printed with 0.3mm layer height, to give it a rougher grip in the arm/holder.
