I have imagined a tape dispenser using a minimal amount of material, allowing the wheel of tape to become the visual centerpiece, and more importantly, easy to dispense.

There are 2 versions of the “Indispensable Tape Dispenser”:

- The first one (V\_easy) is a version with 3 different pieces to allow you to not use supports during the print (easy print version).

- The second one (V2) is a version with just 2 pieces to allow you to use glue compared to the first version.

### Print parameter:

- Nozzle: 0.4mm
- Layer: 0,1 - 0,2 mm
- Speed: 40 - 60 mm/s
- Support: Yes for the (V2) version but not for the (V\_easy) version.
