### Summary

Fischer Plastics (AU) make 320x200mm storage boxes in various compartment sizes, but I wanted even smaller compartments!

Fischer make their large (310x200x48mm) storage boxes in 1, 12 and 18 compartment varieties. I have a bunch of 12 compartment boxes, and wanted to increase that to 24 or 36 compartments. The sizing of these bins is a just-loose-enough fit that the variations in compartment shape and size, which are inherent in the Fischer design, is taken into account. <https://www.fischerplastics.com.au>
