### Summary

A tape holder ready for different tapes and freeing it when laid flat.

[Household](#) > [Office](#)

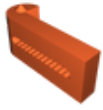

Tags: [holder](#) [tape](#)

I wanted a tape holder that does more than play this singular function. Behold the tape holder and freer of tapes! The tool is readily adjustable and comes with spikes to help lift up tape that slips and becomes flat on the roll (which is always hard to lift back up).

Everything snaps together.

No need for support. Print out one of each model, with two copies of the base.
