Summary

Designed a base for Wiikendz amazing lithophane lamp design. Allows you to use an LED strip for the lighting.

Tags: [lithophane](#) [lamp](#) [led](#) [battery](#)

This is a printable base for the [Round Lithophane Lamp by Wiikendz](#). It has a channel to route [this LED strip](#) through the bottom. The strip can be wrapped around the central column and the battery holder can be hot glued into the base. The main lamp sits on top of the base and can be freely rotated. The optional battery door uses M3 screws with M3 heat set inserts in the base.

Install the battery holder without its included battery door.

I have also included a version of the model split into 2 pieces for easier, support free printing. There is a ring on bottom half to help align and glue the top piece on.
