This is first stage, my own device to lock Hotwheels with a track cutted in the half and attached in the wall.

My own idea is create a cheaper, secure and amazing visual impact of my Hotwheels collections wallmounted.

I recommend to you buy Hotwheels track in DollarTree, they are longer than normal track (22in long), but you can use any Hotwheels normal track.

The second stage will be a base to hang up a track attach between rows.

Please let me know if do you have any suggestion, and please visit my youtube channel www.fuegoazul.com
