[vase](#)

A high-quality 3D printable flowerpot modeled after the famous masterpiece by Michelangelo. Highly optimized for 3D printing, no support required, no post-processing required. Just print with the filament you desire, and it will look perfect and ready to use. Consists of 2 parts, the top has built-in small holes for excess water and the base serves as vessel. Perfect gift for flower lovers from a 3D printer owner.

For Non-Commercial, personal use only. If you own a 3D print shop, you can obtain a permission to sell the physical prints.
