Summary

A FuelRod Battery case mount for Honeycomb Storage Wall

[Household](#) > [Other House Equipment](#)

Tags: [hsw](#) [honeycombstoragewall](#) [fuelrod](#)

I have had this FuelRod I picked up at Disneyland hanging around my desk for a while. It takes up space, but I also want to know where it is when I need it. So I made a little clip for it to set on.

I printed mine upright because I wanted the strength in the arms that wrap around the tube. This came out imperfectly because the tree supports didn't do the best job with supporting them. That said, it did work, and the flaws are pretty minor.

You will also need an insert-with-M3 from the HSW, as well as an M3 nut and a 10mm button-head screw.

I fully acknowledge that this is a very niche item to have on a storage wall - but what the heck, someone else may find that they also want to store a FuelRod.
