Summary

Mount directly to wall or to HSW (honeycomb storage wall)

[Hobby & Makers](#) > [Organizers](#)

Tags: [drill](#) [honeycombstoragewall](#) [hsw](#)

This is the drill model I designed it for. I can't guarantee it'll work with other models, but I've included the step file for easy modification.

Mount directly to wall

- Just use two screws

Mount to HSW

- Use two M3 inserts
- Make sure the honeycomb baseplate is attached to the wall somewhere close to the drill, because it's kinda heavy and will exert a bit of torque on the baseplate

Print settings

- No supports

- Enable brim if necessary

Battery/charger holder

I also made a [mount for battery/charger](#).

Post your makes!
