The Original Prusa Enclosure Mesh Side Boxes made by VisualReversal is an amazing item to add to your printers. Since the release of the MK4 these no longer appear to fix correctly. I made some slight adjustments so that this model supports the MK4 release.

I also updated this model to include a section for optional mounting to the t-slot on the MK4 to prevent the side boxes from shifting inside the

enclosure. This also has the added benefit of lifting the boxes slightly off the bottom of the enclosure to account for the screw holes that protrude slightly.
