Summary

The Plant Water Feeder from Araucaria Lab is very good, but for my plants I need less water.

Tags: [plant](#) [feeder](#) [plantfeed](#) [feedplant](#)

The Plant Water Feeder from Araucaria Lab is very good. Unfortunately, for my plants the feeder gave to much water. So I closed most of the holes, except one.

No support.

I printed in 0.16mm

15% infill
