Sky-Watcher Star Adventurer - Polar Scope Align Pro App & Compass - Assistant Bracket

NO SUPPORTS REQUIRED

To assist with orientation when using a digital/standard Compass and the Polar Scope Align Pro App, to assist setting up your Polar Alignment.

Attaches to the declination bracket front plate. Set up you star tracker orientation without having to hang onto your phone at the same time

thereby getting precise north/south positioning of the Star Tracker during polar alignment process.

As the Declination plate is faces directly toward either Polaris NSP or Octans SSP at the required declination the bracket can be used with the Polar Scope Align Pro App (when using an iPhone)

The bracket has a protruding guide on its edge to fit snug against the side edge of the declination bracket providing further accuracy.

Fits phones 76mm wide x 154mm long

20mm hole on the phone support is so you can push you phone out from the bottom while leaving the bracket there.

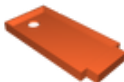

REQUIRED

1. 2x M3 knurled nuts - insert (press fit carefully) into the two 4.5mm holes on the under base of the phone support
2. 2x M3x12mm screws
3. 1x 3/8" wingnut or standard nut to secure the bracket to the declination plate.
4. An alternative is to glue the bracket to the phone support if you want to bypass the M3 nuts.
