I 3D printed my tires using 40D FLEX material.

However, they ended up getting stuck on the screws due to the tight tolerance.

To fix this issue, I modified the cylinder part of the screw by reducing its diameter to 9.7mm. Now, the screws fit perfectly with the FLEX/TPU tires.

I would like to express my gratitude to rorys3D for providing the Little Pit Stop models.

This remix is based on

Little pit stop - Jeep Willys
