[fan](#)

Fan Shroud Adapter to make a 60 mm Fan fit to a 45 mm Fan mount. Used to upgrade a 10 W Genmitsu Laser on the LC-40 Laser Machine.

This way its possible to mount a silent Noctua NF-A6x25 to keep the laser quiet during operation while still retaining the same amount of airflow. Due to the offset, mounting via 3 screws is the tradeoff.

The normal File is with holes in the top. V1 is without holes. Depends on your slicer if its able to get the bridging right. If not, use the V1 and drill the holes yourself.
