Summary

Model replaces the stock polycarbonate hydraulic pump cover for a Place Diverter (Jet boat accessory). Tahiti and blank.

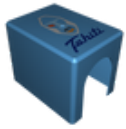

[Hobby & Makers](#) > [Automotive](#)

This object can be printed to replace the original plastic cover for a Place Diverter hydraulic pump. This pump is an accessory for Berkely and Dominator jet pumps in boats which diverts the stream of water into a rooster tail at the flick of a switch. I have included a blank one, as well as a two color Tahiti branded design. There is a tapered screw washer which should be printed separately for both styles. Print with outdoor stable filament, upside down.
