This is a 3d printed door jim modeled after the Sparrows Mini Jim because I'm a cheap ass and didn't want to pay \$10 + Shipping. Use it to open doors. It's currently 1.5mm thick and I kind of want it thinner but it's already a bit flimsy so I'm using it as is.

100mm x 20mm x 1.5mm

Mine is printed in PLA+ at 0.2mm layer height.

Here's a demo on a locked door: https://www.youtube.com/shorts/_unj2HPTBw
