Inspired by this model of a 3D printing colleague

<https://www.printables.com/de/model/270144-dremel-rotary-tool-organization>

, which is a very good choice for Dremel tools, I drew my own smaller version especially for Proxxon tools.

This model is only suitable for Proxxon tools with a diameter of 2.3 mm.

Printed in PLA

Layer 0,2

infill 20%

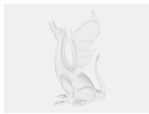

walls 3
