About

I have this neat c-table with storage that's perfect for a remote. However, it would often fall inside the storage tray. While it's not a big deal- why not solve that problem with 3D printing?! :)

This remote holder was mainly designed to fit inside the storage compartment, it can be used standalone as well.

Print Settings

I printed this on my Prusa Mini+ with a 0.6 mm nozzle at .30 layer height, 20% support cubic.

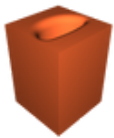

Design

Designed with Onshape. The design can be found [here](#).

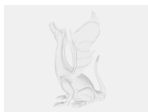

Filament

Polymaker PolyLite PLA Pro, Black
