I didn't have a good storage solution for my wrapping paper and ended up always buying new rolls because I couldn't find it or thought it was empty ;)

That is why I came up with this holder that I attached to my shelf with double-sided tape. Now my wrapping paper is stored neatly and I can always see what I have.

Print instructions

The holder consists of 2 separate parts: 1 top and 1 bottom

On a bigger printer you might be able to print them at the same time with my Prusa Mini+ I printed them separately.

No supports needed
