### Summary

Easily hold the honeycomb wall on the side of a Bambu Labs X1C by sticking this plate under an AMS on top

I wanted a tool wall on the side of my Bambu Labs X1C similar to the PIP tool holder. This is a simple holder that fits under the feet of my AMS on top of my printer to hold the wall on the side.

My setup is using these parts from the original:  
4x - wall-honeycomb-224x190size(mk3s).stl

4x - insert-hollow-dual.stl (the holder fits into this part)

1x - insert-hollow-for.stl

1x - Honeycomb Wall AMS Holder Centered.stl

Then you can print any inserts/shelves you want for your tools.

## Model files

**honeycomb-wall-ams-holder-centered.stl**

**honeycomb-wall-ams-holder.stl**

☐ Probably don't use this, mounts off center since AMS at back of printer
