Tags: [redmi](#) [seatmii](#) [smartphoneholder](#) [skodacitiygo](#) [vweup](#)

The smartphone holder which came with my car was to small for the Redmi Note 12 Pro. Therefore ein designed a new holder to replace the original one.

Important: To use the holder with one of the following cars, you have to print also this Adapter: <https://www.printables.com/de/model/518100-upmiigo-smartphone-adapter>

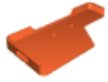

- VW eUp 2020
- Seat Mii electric 2020
- Skoda CitiyGo 2020

Print settings:

- Material: PETG or ABS (PLA does not work well in the high temperatures which can occur in cars)
- Support: Touching build plate
- Adhesion: Skirt

- Infill: 50%
