

Controller Stand Badge System

R Rand K

[VIEW IN BROWSER](#)

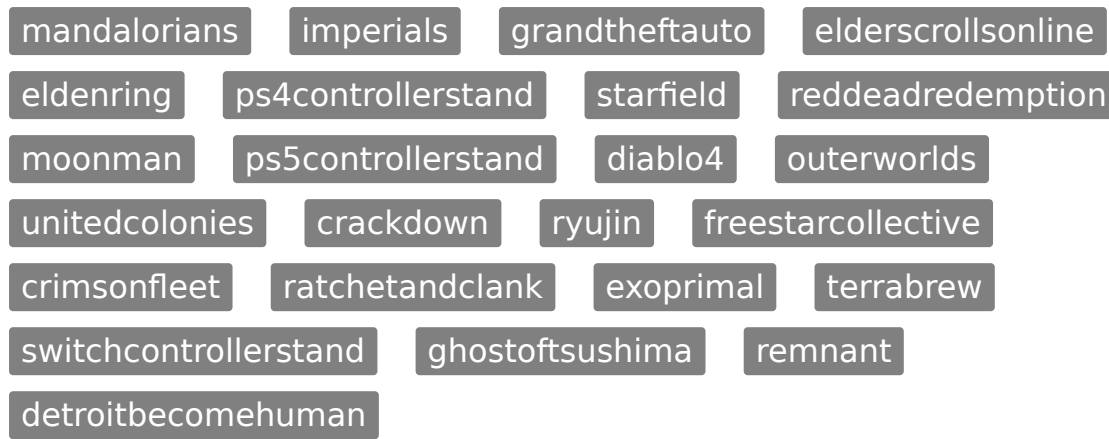

updated 31. 8. 2023 | published 31. 8. 2023

Summary

This badge "system" enables you to mark your Xbox or PS5 controller stands (and more in the future) with badges!

[Gadgets](#) > [Video Games](#)

After posting my first remix, the [XBox Controller - Starfield Edition](#), I realized that others might want different games shown instead of the one I made.

So I redesigned the model by placing a couple of voids in the middle of the stands, allowing you the ability to place your own badges on your stand. There are controller bases for Xbox (2 types), PlayStation 5 (2 types), PlayStation 4, and the Switch Pro Controller.

Stand Print Settings:

- No rafts.
- No supports.
- Layer Height: 0.1 - 0.2mm

Badges:

- No rafts.
- Some require support; check for overhangs.
- Layer Height: I'd recommend a .2 nozzle, or at the very least, a .4 nozzle set to .08 printing.

Checkout:

Make sure to check out the [Magnetic Storage Base for the PS5 Controller](#) made by jpbear09.

Make your own:

If you want to make your own badges, I have included blanks, so all you need to do is place your favorite logo on them. (Thanks to Gummibjorn for the idea!)

To make a logo, you can find or create a PNG file and then use a website such as convertio to convert them to the SVG format, which you can then import into your slicer (if supported).

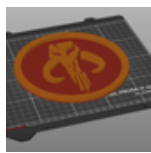

They should be the following dimensions:

- X: 39.96
- Y: 39.96
- Z: 10+

I have also included a pin to help push out any stubborn badges. Printing it as an STL may require support.

Notes: There appears to be what looks like a crack that appears in the switch STL version. I looked at it and it appears when I import the original model into tinkercad. I'll notify the author and see if they have any ideas. I am printing another copy of the base to see if it appears. Thanks again to Gummibjorn for notifying me about this.
