Create your own battle droid army and take over the galaxy!

If you like this model, please throw me a like. Designing the models is time, filament and coffee consuming. [If you want to support my work by me a coffee \(PayPal\)](#). Thanks!

[Check out my other models.](#)

Description:

This is a KIT CARD remix of my B1 battle droid. I changed the design in many places to make it easier to assemble and allow the figure to stand and pose on its own. Check out the compatible [STAP speeder bike](#)!

Scale 1:9 (90% for 1:10)

Improvements:

- improved connection points
- easier to assemble
- improved stand and pose of the figure
- Blaster *pio* *pio*
- kit cards

May the force be with you!

Roger roger!

Update:

(21/08/23)

- optimized base

(03/08/23)

- optimized size for smaller printer and better to print fingers
- addet base and insert to chest

(26/07/23)

- optimized fit of head, thin, pipe, backpack and blaster
- addet thumb to forarm, hole for blaster in backpack

(13/07/23)

- optimized fit of ankle and blaster

Printing:

Layer height: **0.1**

Supports: **No**

Brim: **No**

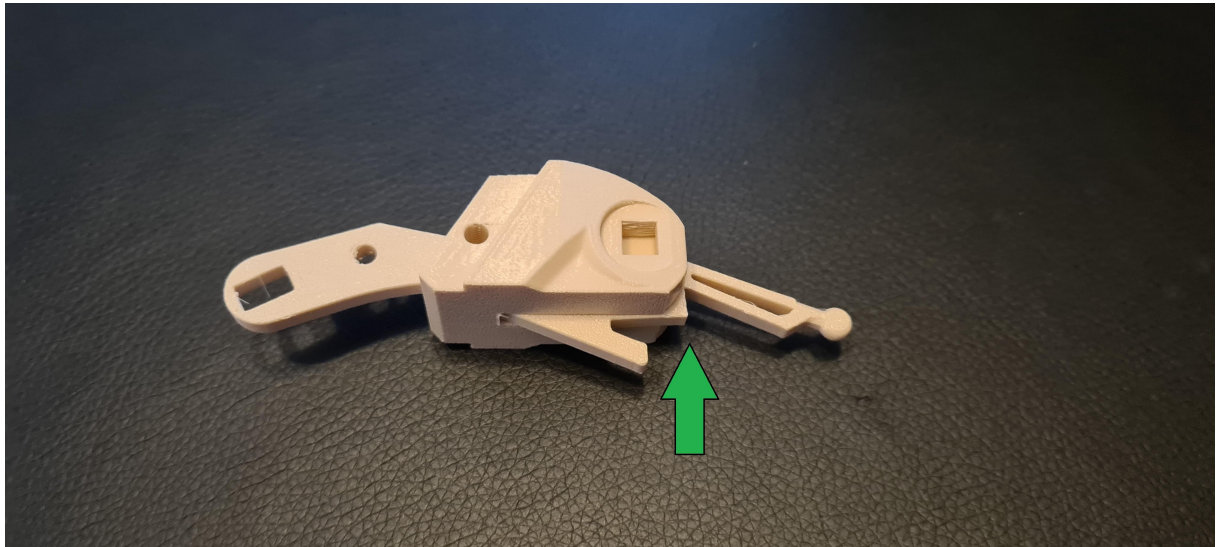

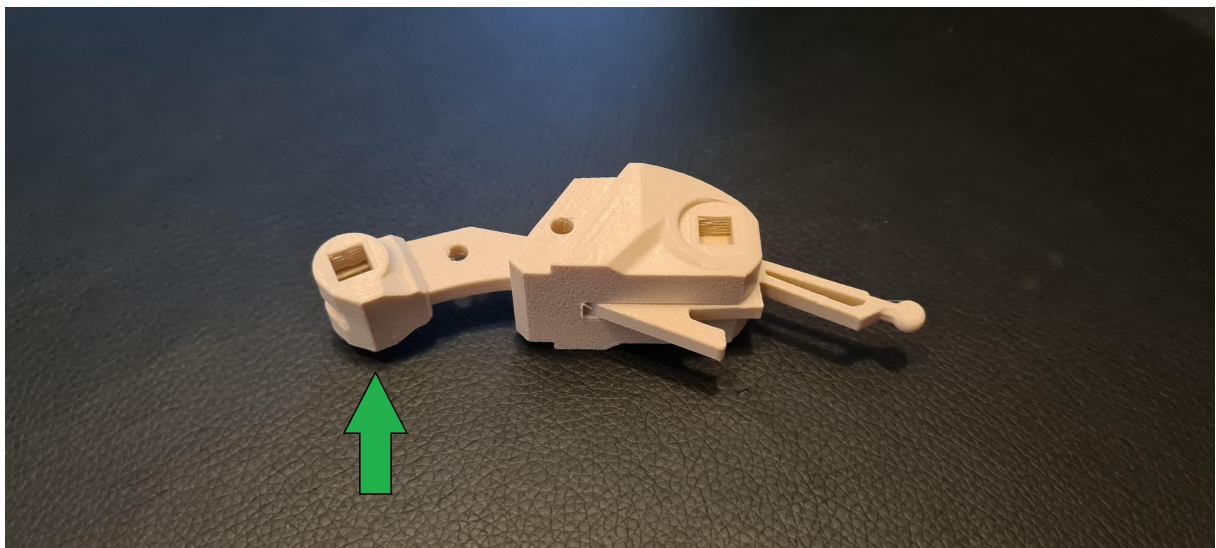

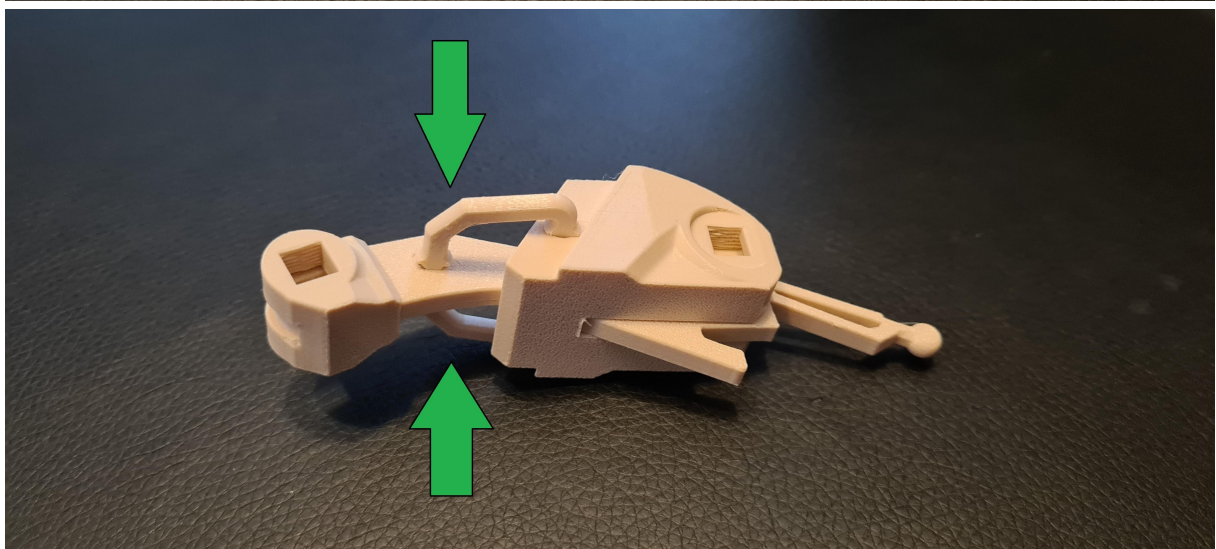

Material: **PETG, (ABS), (PLA)**

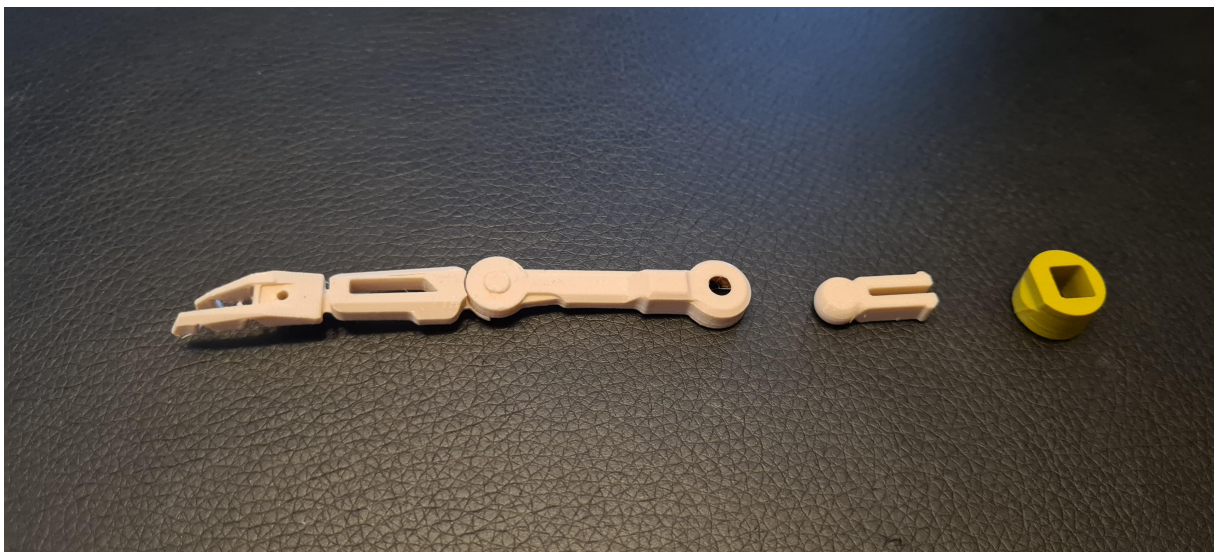

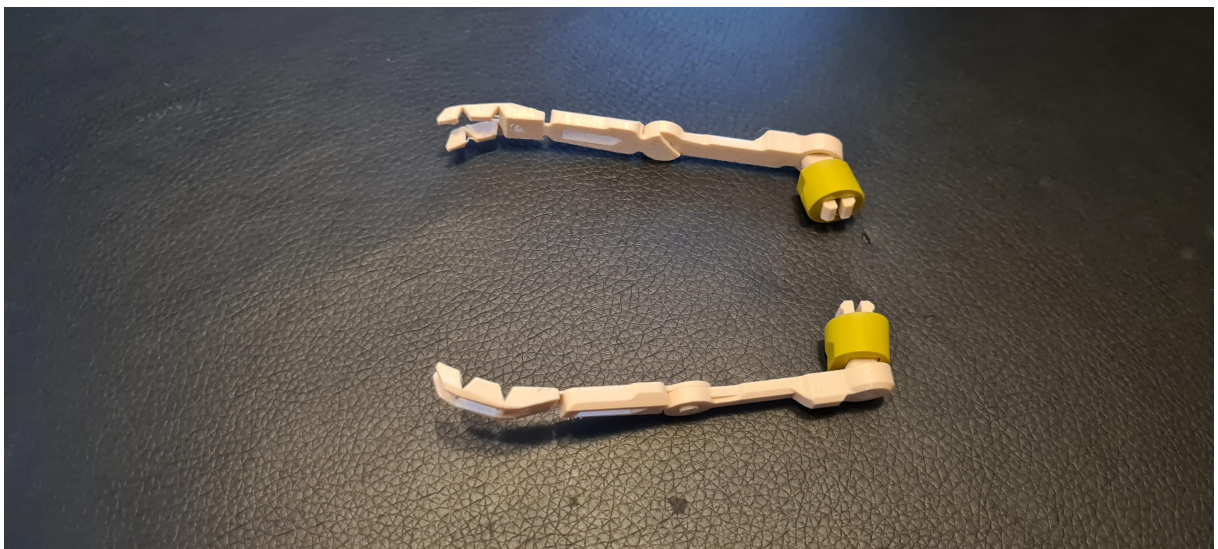

Assembly:

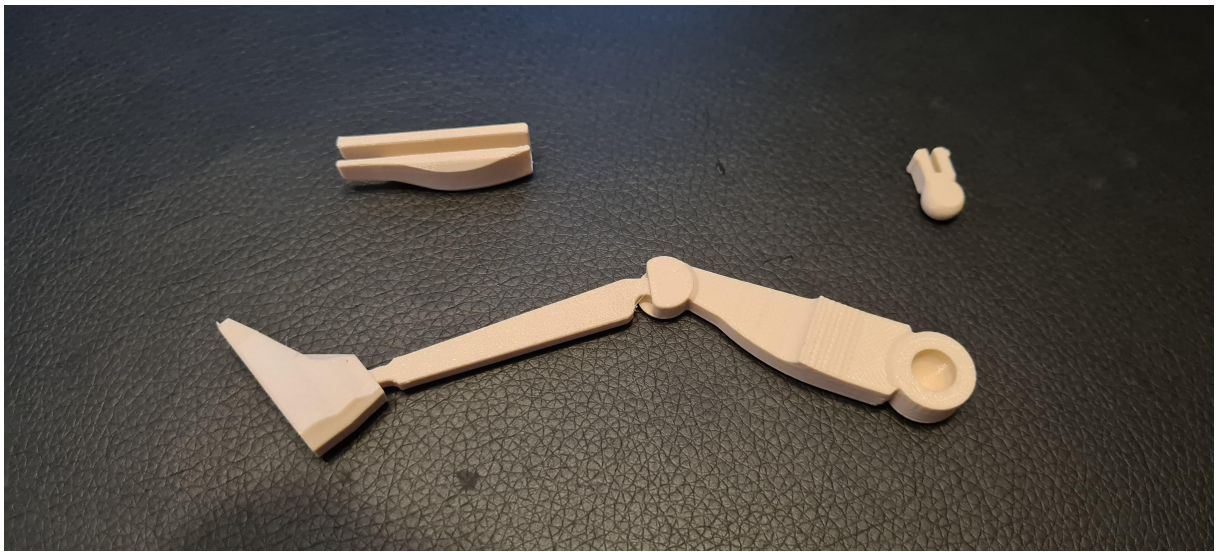

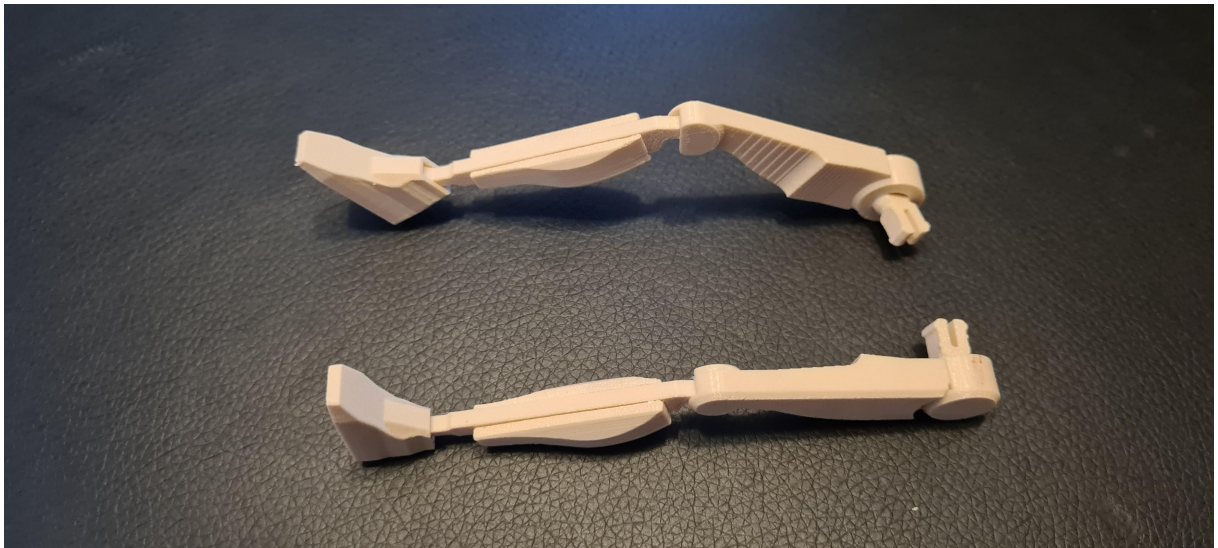

The connections are designed and optimized for PETG, the use of PLA or ABS makes assembly more difficult.

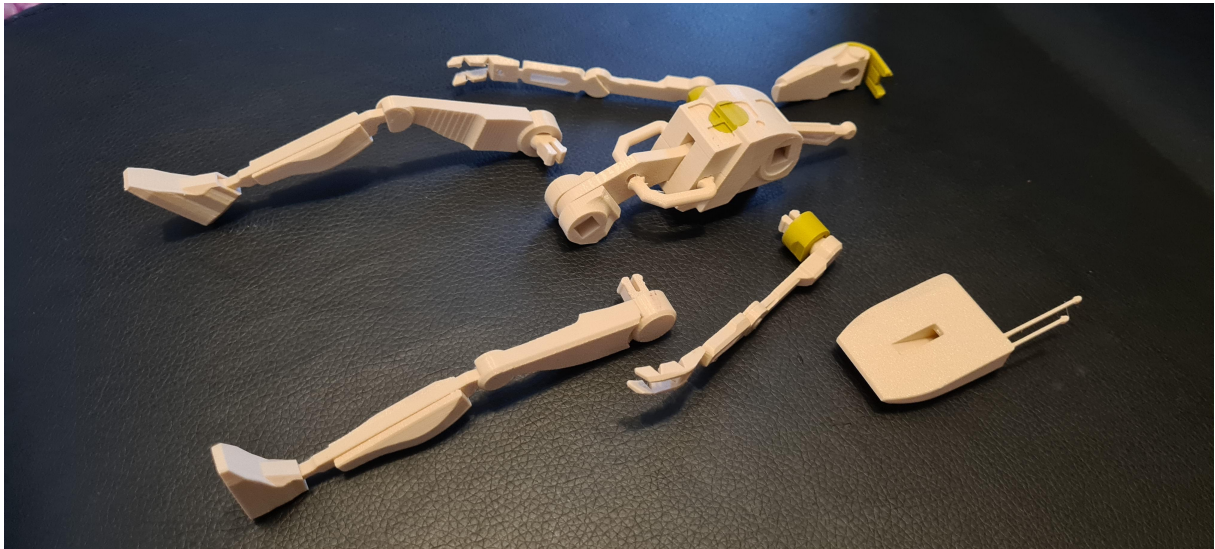

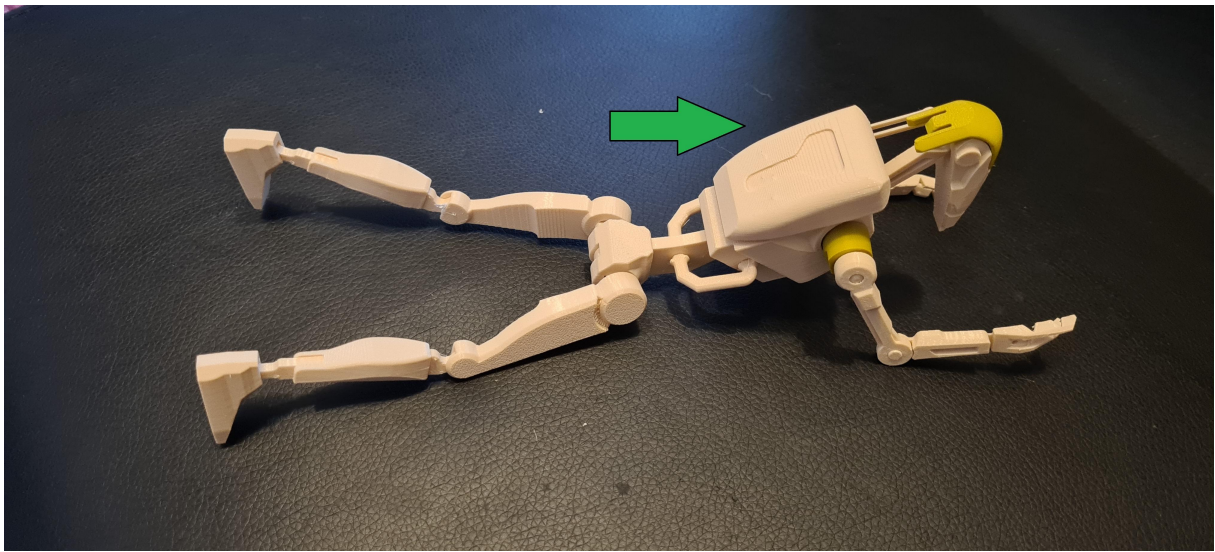

It is better to rotate the knee and elbow joints than to push them into place.

In order to replicate the design of the B1 battle droid as closely as possible, I was forced to make some parts very fragile. Please be ready to reprint parts in case of breakage. Separate parts are located in the respective folders.

This remix is based on
