It's a fully printed, pocket size crossbow Have fun!

don't hurt anyone

How to make it

1. print the file kitcard_crossbow.stl

2. separate all the parts (maybe using a small wire cutter)

3. take the part with the R and put the pins in

4. connect the bow with the middle part

5. put together the two sub assemblies

6. add the trigger

7. now the part with the L

8. put on the bowstring

9. load and shot

changelog:

#9.10.23 made the pins smaller for more clearance

#8.8.23 optimized geometry of bow and changed g-code to petg on MK3
