IMPORTANT NOTE ON COMMERCIAL USE OF MY MODELS

Please note that I am sharing my designs to any one to enjoy but **for personal use only**. I have **NOT provided any commercial license** to any one allowing the sale of 3d printed copies of my designs. Seeing my designs being sold for profit is discouraging for me to continue coming up with more designs.
I will not hesitate to report to Etsy and other online sites if I find them being sold.

Easy-to-assemble, **quick print**, kit card of **Minecraft Axolotl** in **mini figure** scale. Parts can easily be removed from the sprue without using cutters/clippers just by twisting the part.

Default scale is comparable to the Minecraft mini figures but of course you can scale it up to as large as you want! :)

Usage Options

1. Assemble as is and use as **toy/collectible**; or
2. Use the alternative **part with loop** and glue the halves together to make for a great **keychain ornament**!

Printing Reminders

- Print as oriented, with **NO supports needed**. Model comes with breakaway supports.
- If you're **printing in multiple colors**, make sure the **filaments are of the same type** and that they **fuse together**. Otherwise, the **gills will breakoff easily**.

Revision History

- **2023-07-15:** Added **Bambu Studio/Orca Slicer project file** with **pre-configured colors**
