

AT-ST Walker Kit Card

[VIEW IN BROWSER](#)

updated 8. 9. 2023 | published 8. 9. 2023

Summary

A sturdy, easy to build, and detailed model kit based on the AT-ST from Star Wars

Update: 08/09/2023

Updated some slots for better fit, hip-to-neck slot is arrowed for correct orientation, and improved surface icons for orientation of "skull" parts. Also added are not boring instructions, but an exploded view showing correct part placement!

The Imperial **AT-ST** "Chicken Walker" scouts ahead on the lush moon of **Endor**, seeking out any potentially rebellious individuals attempting to halt the Emperor's efforts. Fast moving and nimble for its size, and still extremely deadly with a half-decent pilot, it is not something you would want to be caught out in the open with, Jedi or not.

Ohhh god is that a **teddy bea**--aaaarrghkk---!! <Boom noises>

This is a kit I've been wanting to make properly for a few years now, and **finally** sat down to give it a real attempt. I hope I have done it justice!

Some parts are super **small**, so some care is required. Additionally the kit should scale up just fine, although untested as of yet!

On folding the main body panels, it is okay if one or two panels sheer off, it will still stick together, but if 3 or 4 fail, a little glue may be required for the roof piece!

(If this is a big enough issue I may add another connection, I just wanted to preserve the top detailing.)

Included is just the regular fit for the time being, try setting outer walls to print first.

You can make it **EVEN TIGHTER** by increasing the Z-scale by **15%**. For those uninterested in the card format, there is a frameless variant included!

Print at **0.2mm layer height**, there really is no benefit from printing at a higher resolution and it could affect the fit.

Be sure to print with **100% infill** for it to hang straight as the weight distribution can be sensitive!

Having trouble getting the tolerances just right? **Set Outer Walls to print first.**

Makes greatly appreciated, always glad to see them! Happy Printing!
