Summary

A tunnel for a fish tank, great for fish or crayfish.

Household > Pets

Tags: tank fish tunnel fishtank crawfish underwater crayfish

This is a tunnel for our crayfish tank for him to be able to hide underground. It has ridged steps so this should work for other critters or fish too.

Dimensions:

- Bottom to top: 76.2mm
- Bottom to sand: 57.15mm
- Total width: 438.55mm
- Depth (front to back): 79.7mm

Printing details:

- I used Overture Matte Light Brown PLA.
- Printed on its side in 0.3mm layers (Prusaslicer 0.3 draft).

- In order for it to fit on my Prusa MK3 I cut it in half and welded back together with a soldering iron. See the included the 3mf of it pre-cut and plated.
- Another suggestion would be to connect the two models together in the slicer to make one smaller, continuous piece.
