Summary

I modified a remix from hellminor on thingiverse, to make the shell flat, so kids can play with it, it doesn't roll.

I modified a remix from hellminor on thingiverse ((originally designed by ThatGuys also on thingiverse), to make the shell flat, so kids can play with it, it doesn't roll.

EDIT : added some spikes to be able to have the blue version.

I cut in two pieces in case you want to print in different colors separately. Though I'm well aware the topology is awful, but it's too much work modifying this existing shell.

On the picture with colored shells, those are hand painted, I don't have multi material system.

This remix is based on

Red/Green Turtle Shell

by hellminor
