Sleeve for first generation Apple Pencil, because it's too slippery to hold and will roll off tables when not held.

Print instructions

Tolerances need to be really tight because Apple has made the pencil surface near-frictionless. Print a 1mm test slice from the middle to test fit. Or jam a tiny piece of electrical tape inside the sleeve if you printed it too loose.

Scale z to taste. XL has minor non-symmetric details that might fit right-handed users better. Mirror an axis for left-handed use. Or don't.

Photo: printed with a stock Prusa Mini+, 0.20mm quality profile avoiding crossing perimeters. Prusament Galaxy Silver PLA.
