## Summary

I spent some serious time to make sure this had a perfect pattern! Minor thread diameter: approx 23mm, major: approx 25mm

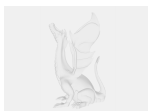

[Household](#) > [Outdoor & Garden](#)

Tags: [wateringcan](#) [wateringcannozzle](#)

The old watering can nozzle cracked after being in the sun for too long. I printed this one to replace it and have a more even pattern. I also minimized internal volume to minimize drippage.

Print large flat side down.
