### Summary

Bumper printed with flexible filament to replace the ones that fall out and get lost

This is a bumper for the center console on the 96-98 Jeep Grand Cherokee ZJs. I printed mine in Polymaker 95A TPU.

I recommend cleaning up the old holes with a 10mm drill bit by hand (not in a drill!) and/or blade and/or wire cutters. One side has a flat spot that you should line up with the flat spot on the bumper.

The center console feels MUCH better now! No more janky catching on the latch when you try to open it and rattling around while driving.
