[dichtung](#) [connector](#) [dn150](#)

DN150 lid for IBC containers, with an added 3/4" connector (around 26mm outer diameter). The added 3mf file has a negative part to ensure the hole, make sure to open it is Prusaslicer/Orcaslicer if you cannot see it.

I am using the existing seal from the lid that came with the container.

Printed upright with tree supports in PETG Sunlu Black, 0,2 LH, 4 walls.
