Summary

Bins to organize screws, fasteners and other small objects in Durham boxes

This is a fully customizable storage bin system to fit in Durham boxes. Mix and match sizes to fit any items you want to store. For small screws and fasteners I'm using the 6y8x, giving me 48 bins per box. I've included files for 4 box sizes that you can mix and match. But if you want something different you can use the OnShape link below to get a copy of the design and modify it. All you have to do is open the Variable Table tab and change the number of bins in X and Y, then select one from the Parts area and export it. Each bin has a cut out so that it will clear the hinge in the back of the box.
