This is a remix of <https://www.thingiverse.com/thing:1592398>.

I wanted an angle finder that did not extend below the semi-circle so I remixed the above. Added a window on the measuring arm to improve visibility of the angle numbers.

I used a rubber o-ring to secure the arm. It works great. Assorted o-rings can be purchased from Amazon. Example is <https://a.co/d/17CngNZ>.

This remix is based on

Angle meter / Protractor
