I wanted a way to display the apple watch bands in a tube display I made, so I created this simple mockup of the watch.

The bands fit snugly.

I've only printed the basic one, but I imagined someone would like to have some pointers and numbers on the watch face.

The sides are a bit square so it is easier to print, with one of the sidefaces on the print bed. While writing this I quickly made a version with softer edges (fillets and chamfers), but it is untested, I'm not sure it has enough surface for good adhesion to the print bed.

Print instructions

Print with one of the watches side faces facing the print bed. No supports needed.
